PART IX
INDEX TO GENERA OF SPECIES-GROUP NAMES

INTRODUCTION

This section is straightforward and needs little introduction. The objectively valid names are shown in 'bold', the objectively invalid names in 'light' and the unavailable names in *italics*, and these differences are also reflected in the indentation level of the names. Generic names are shown without authorship, but this information is given in Part IV. A heading like '*Lycaena* (?)' means that the included species may belong to *Lycaena*, while headings like '*Lycaena* (??)' means that the included species probably don't belong to *Lycaena*. Keys to the higher classification are given for each genus. For example, *Abisara* is keyed as **Lyc:Rio:Nem:Nem:Abisariti**, which can be read as Superfamily Lycaenoidea, Family Riodinidae, Subfamily Nemeobiinae, Tribe Nemeobiini, Subtribe Abisaniti. The keys for the fossil genera are given as "Fossil", but some additional information about their placement may be found in Part IV. Nominal species which are type-species are marked with a * if they are the type-species of the genus in which they are placed, or with a + if they are the type-species of a generic name which is in the synonymy of the genus in which they are placed.

ABBREVIATIONS

The following abbreviations are used in this section.

H.....	Homonym
IOS.....	Incorrect Original Spelling
ISS.....	Incorrect Subsequent Spelling
JOS.....	Junior Objective Synonym
MID.....	Misidentification
NN.....	Nomen Nudum
PD.....	Pending Decision (by the ICZN)
PS.....	Published in Synonymy

PART X
INDEX TO BIBLIOGRAPHIC CITATIONS
FOR
SPECIES-GROUP NAMES

INTRODUCTION

This section is straightforward and needs little introduction. It consists of an index to all those publications which contain either original descriptions or selection of type specimens. For original descriptions the data is arranged into four columns, information on the type, status code, name and original genus and page citation. For type designations the first column is always blank and the status code is replaced by 'T'. The genus-group names used are those used in the original descriptions, not those in which the name is presently placed.

ABBREVIATIONS

The following abbreviations are used in this section.

H	Homonym
IOS	Incorrect Original Spelling
ISS	Incorrect Subsequent Spelling
JOS	Junior Objective Synonym
MID	Misidentification
NN	Nomen Nudum
PD	Pending Decision (by the ICZN)
PS	Published in Synonymy

PART XI
BIBLIOGRAPHY

INTRODUCTION

This section is straightforward and needs little introduction. Abbreviations used in journal titles have been taken from the *World List of Scientific Periodicals* [b5340]. I have tried to provide the full names of the authors, and to give some information about where and when they were born and died, and what happened to their collections. This information has been taken from various sources, but the works of Gilbert, 1978 (*A Compendium of the Biographical Literature on Deceased Entomologists*) [b2411], Carpenter, 1945 & 1953 (*Bibliography of Biographies of Entomologists*) [b1209, b1210], Horn & Schenkling, 1928 (*Index Litteraturae Entomologicae, Serie I*) [b2725] and Derksen and Scheiding-Göllner, 1965 (*Index Litteraturae Entomologicae, Serie II*) [b1589] have been most helpful. In general papers with multiple authors are only listed under the senior author, but in cases where junior authors have published material which has nomenclatural implications (i.e. type-species selections), the paper is given a second entry.

The 1776 edition had an altered title page, but nothing else was new. On Official List of Works Approved as Available for Zoological Nomenclature (#37), The Official List title has some words incorrectly spelled! Many names in it are nondescript. It is necessary to check each name carefully. The short lists of species in lettered groups are separated by large chunks of German which can include descriptions. Some names in the lists are given "indications" and some are illustrated. Koçak has reviewed the status of the names, but his views are rejected by others. The Supplement came in 1869 and 1878 - not all at the end. The title above is the final one, slightly changed from the first one, "- - Lepidoptera. Part I, Lycaenidae", issued when Hewitson had not finalised his plans. Hewitson died 28 May 1878. The last part was published by H. Grose-Smith, as explained in the Preface, 6 months later. The text was finished by W. F. Kirby, who is shown as responsible for the last new name, *Hypolycaena amba* Kirby (p. Supp. 32, pl Va). After publishing the Specimen Cat. lyc. in B.M., the Br. Mus. "declined" to publish further parts, so Hewitson turned to van Voorst for this fresh venture. The two works are separate, but the Index to the latter covers both. [CFC, pc]. [Ref: b2256] {1863-1878}

- b2518 1946 Opinion 173. On the type of the genus *Agriades* Hübner, [1819], and its synonym *Latorina* Tutt, 1909 (Class Insecta, Order Lepidoptera), genera based upon an erroneously determined species. Opin. Declr. Int. Comm. Zool. Nomen. 2(43):483-494. {22 Jan 1946}
- b2519 1946 Opinion 175. On the type of the genus *Polymnatus* Latreille, 1804 (Class Insecta, Order Lepidoptera), a genus based upon an erroneously determined species. Opin. Declr. Int. Comm. Zool. Nomen. 2(45):509-520. {22 Jan 1946}
- b2520 1954 Opinion 232. Suppression, under Plenary Powers, of twelve generic names in the Order Lepidoptera (Class Insecta) published by Illiger in 1807 in senses different from those in which those names were published by Fabricius later in the same year. Opin. Declr. Int. Comm. Zool. Nomen. 4(22):249-274. {21 Apr 1954}
- b2521 1954 Opinion 269. Validation, under the Plenary Powers, of the specific name *idas* Linnaeus, 1761, as published in the combinations *Papilio idas*, and determination of the species represented by the nominal species *Papilio idas* Linnaeus, 1761, *Papilio argyrognomon* Bergsträsser, [1779], and *Papilio argus* Linnaeus, 1758 (Class Insecta, Order Lepidoptera). Opin. Declr. Int. Comm. Zool. Nomen. 6(1):1-24, 1 pl. {10 Sep 1954}
- b2522 1954 Opinion 270. Addition to the "Official List of Generic Names in Zoology" of the names of five nominal genera of Butterflies (Class Insecta, Order Lepidoptera), originally established with misidentified Type Species, for which Type Species in harmony with accustomed usage were designated under the Plenary Powers in 1935. Opin. Declr. Int. Comm. Zool. Nomen. 6(1):25-40. {10 Sep 1954}
- b2523 1954 Direction 4. Addition to the Official Lists and Official Indexes of certain scientific names and the titles of certain books dealt with in Opinions 134-160, exclusive of Opinion 149. Opin. Declr. Int. Comm. Zool. Nomen. 2(53):629-652. {1 Oct 1954}
- b2524 1954 Opinion 278. Addition to the Official List of Generic Names in Zoology of the names of ten genera of the Sub-Order Rhopalocera of the Order Lepidoptera (Class Insecta), species of which were cited in the undated leaflet commonly known as the Tentamen, prepared by Jacob Hübner, which is believed to have been distributed to correspondents in 1806, a leaflet rejected in Opinion 97. Opin. Declr. Int. Comm. Zool. Nomen. 6(10):135-178. {1 Oct 1954}
- b2525 1956 Opinion 400. Validation under the Plenary Powers of the generic name *Melanargia* Meigen, [1828] (Class Insecta, Order Lepidoptera). Opin. Declr. Int. Comm. Zool. Nomen. 12(23):419-432. {16 Jul 1956}
- b2526 1956 Opinion 429. Direction under the Plenary Powers limiting to suppression for the purposes of the Law of Priority the suppression of the generic name *Argus* Bohadsch, 1761 (Class Gastropoda) prescribed by the Ruling given in Opinion 185 thereby securing that the generic name *Argus* Scopoli, 1763 (Class Insecta, Order Lepidoptera) shall remain invalid under the Law of Homonymy. PART XII
INDEX TO JOURNALS AND SERIAL

INTRODUCTION

This section is straightforward and needs little introduction. Abbreviations used in journal titles have been taken from the *World List of Scientific Periodicals* [b6065]. Papers with multiple authors are listed under the senior author only, and it has been found necessary to occasionally truncate the author's name to keep the listings orderly. When this has been done it is indicated by using a '*' at the end of the name. For convenience a few publications which were issued in parts with various authors have been treated as if they were journals (i.e. Coll. Selys Longchamps).
